

Flu Vaccine Inventory

Anyone receiving a flu vaccine must meet the following criteria as defined by the Centers for Disease Control and Prevention (CDC):

- All children aged 6-23 months
- Adults aged ≥ 65 years
- Persons aged ≥ 2 -64 years with underlying chronic medical conditions
- Residents of nursing homes and long-term care facilities
- Children 6 months-18 years of age on chronic aspirin therapy
- Health-care workers with direct patient care
- Out-of-home caregivers and household contacts of children aged < 6 months

Your own primary care provider may have influenza vaccine available for those meeting the risk criteria. Please call your provider.

Please call these places to see if supply is available before you go for your flu vaccine.

Updated November 16, 2004

			Number of Vaccine Doses Available for:		
			High Risk Adults	High Risk Children 3-18 years old	Children 6-23 months

FluMist® may be available for healthy individuals ages 5-49. Those who do not meet the CDC criteria to receive the flu shot may receive FluMist® as an alternative.

Those who should *NOT* receive FluMist® include:

- Adults 50 years and older and children younger than five
- People who have long-term health problems with:
 - Heart disease
 - Lung disease
 - Asthma
 - Kidney disease
 - Metabolic disease, such as diabetes
 - Anemia and blood disorders

People with weakened immune systems
 Children and adolescents on chronic aspirin therapy
 Pregnant women
 Anyone with a history of Guillain-Barre' Syndrome

See the list below to find a FluMist® provider.
